Company Overview

Brenco, Inc was established in 1984 as a tool repair center catering to the electrical industry. By the mid-90s, Brenco underwent a transformation and began distributing tools specifically designed for the powerline construction sector. Our company has consistently distinguished itself by not merely being "order takers," but by possessing an in-depth understanding of the equipment our valued customers anticipate from us. We also have a full rubber goods testing lab. We test gloves, sleeves, line hose, blankets, grounds, and sticks.

High Voltage Equipment

Warranty Repairs

Utility Construction Equipment

Insulated Rubber Goods

Grounding Equipment

On-Site Services

From repairs and testing to extremely high-quality parts, Brenco is your one-stop shop for everything related to power lines and high-voltage services. Take care of all your company's needs with Brenco.
